

Alba Facilities Services have been providing mechanical, electrical and building fabric maintenance services at Biocity for over two years, working as a direct supplier.

Through consistent delivery over the term to date, we have developed a strong partnership with Biocity. We are proud to be recommended as M&E contractor on their current office refurbishment project, led by main fit-out contractor Thomas Johnstone.

The project will roll out over the next five months producing significant layout changes within the property. Thomas Johnstone will deliver the building fabric works via direct labour, while Alba work in partnership to modify existing M&E installations and install new HVAC, electrical, sanitary and LED lighting equipment.

The opportunity is testament to Alba's partnering ethos and flexibility, which allows us to work both directly with clients, and as part of their chosen supply chain.
